Digital Twin

Source: GE Digital

Digital Replica of physical assets, Process & systems

KBC & BAKER HUGHES(GE) 19th Sept
"For 1st time O&G customers can build Digital twin of a Plant, refinery or Rig with KBC's Petro-SIM"

Open Process Automation Forum

- Open Process Automation Forum is part of The Open Group
 - ◆ www.opengroup.org
- ExxonMobil selected The Open Group
- The Open Group is a non-profit, global consortium for IT standards

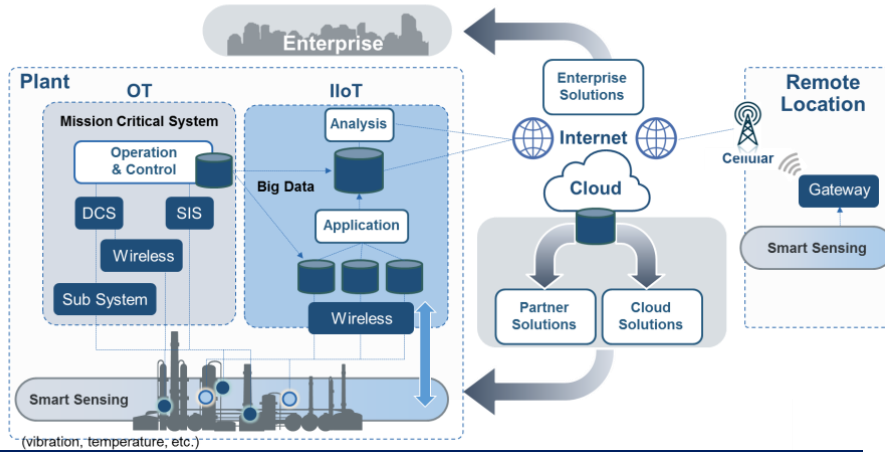

ExxonMobil Automation Vision

OT and IIoT

Process Automation and IIoT Integration

Enabling users in mission critical industrial plants to leverage IIoT derived benefit

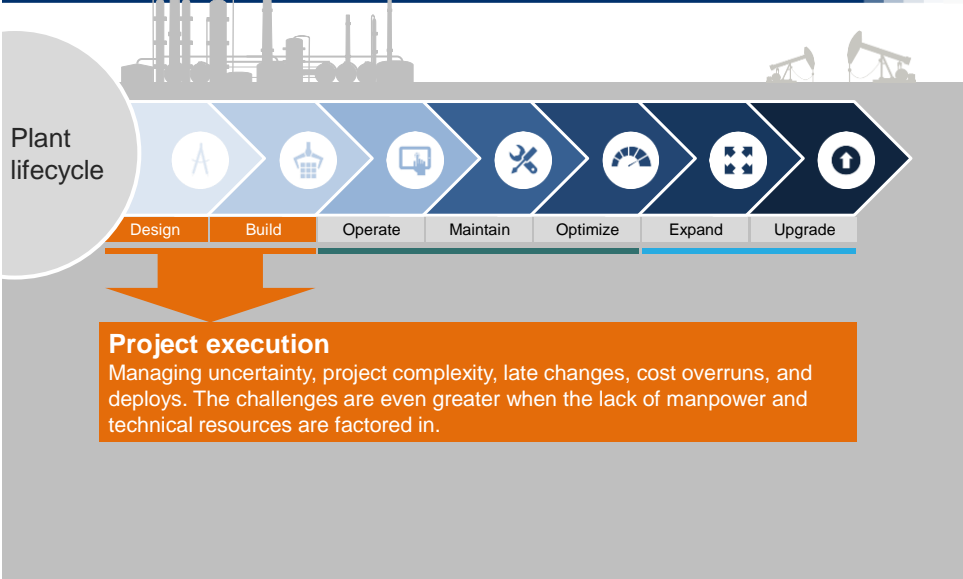

Can you imagine cloud computing replacing our traditional controllers!

Long Term Support & Migration

Full Lifecycle Support for Customers' Legacy Systems
 The migration path for each legacy system is always taken into consideration before a new system is released

Enablers to Solve Customers' Challenges

<p>Smart Engineering</p> <p>A new engineering ecosystem that delivers certainty and confidence.</p>	<p>System Agility</p> <p>System agility that provides flexibility, adaptability and extensibility to cater for plant upgrading or extension needs, in tandem with changes in plant operations and business exigency.</p>
<p>Advanced Operation</p> <p>An advanced operation that empowers operators to make smarter decisions.</p>	<p>Sustainable Plant</p> <p>Optimum system performance throughout the entire lifecycle of the plant.</p>

Yokogawa's Smart I/O Solution

- Yokogawa Smart I/O is designed with **fewer components**.
A single module can be configured to support AI/AO/DI/DO
- An optional signal conditioner can be plugged in to support a **wide range of I/O** signal types (to DCS Only)
- The backplane allows **I/O redundancy by design**, resulting in a smaller footprint

YOKOGAWA ◆

Field Validation Tool – FieldMate Validator

- Facilitate early completion of field work without requiring the entire system to be ready at site.
- Enable flexible binding with DCS at any stage of SAT.
