**TELL ME WHY ?
CLICKNL DESIGN**

DAAN VAN EIJK

WHY ?

- **Vergroten** van Impact van Design
- **Versterken** van Design Research & Innovation
- **Verbinden** van 'Triple Helix'

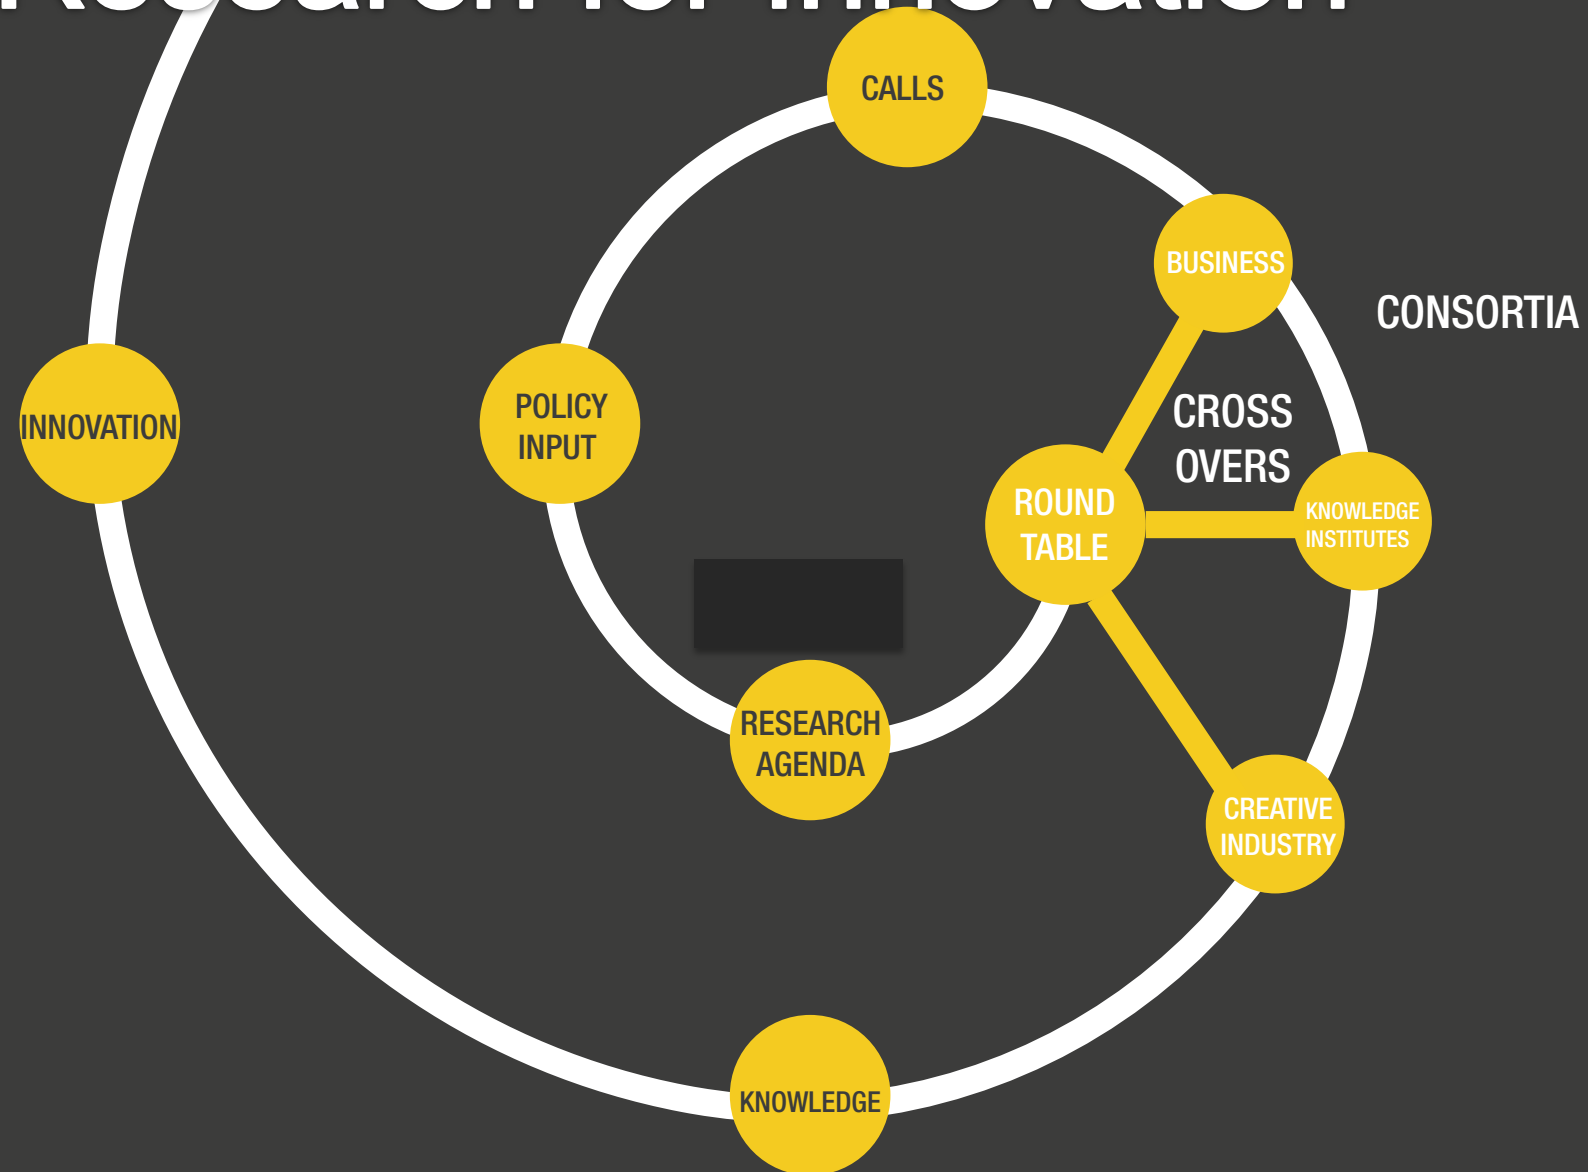

Changing design profession

- *Moving from goods to strategies*
 - *Shorter iterations and lead times*
 - *From supplier to partner in value networks*
 - *Advancing technologies*
 - *Limited resources*
 - *Democratisation of design*
 - *...*
-

Strategic Research & Innovation Agenda

*The Creative Industry Scientific Programme develops a **knowledge infrastructure** which consolidates the leadership position and stimulates the continuing growth of the Dutch Design Sector and Creative Industries.*

*CRISP focuses on the design of **Product Service Systems**, generating and disseminating the knowledge, tools and methods necessary for designing complex combinations of intelligent products and services with a high experience factor.*

CRISP is funded by Dutch government FES funding and a consortium of over 60 scientific and industrial partners.

'testbed projects'

Grey but Mobile

Improving care-related mobility services for the elderly supporting them to live independently and stay social connected.

I-PE

Intelligent Play Environments are those in which a playful persuasion approach encourages social and physical play, which in turn can contribute to wellbeing. Such environments may counter part of the trend that children are not physically active and risk obesity and isolation.

Selemca

Humanising care-droids using creative technological solutions to supplement and replace existing care-services.

Smart Textile Services

An inspirational test bed enables textile developers to understand the multi-disciplinary opportunities and challenges of creating Smart Textile Product Service Systems.

'foundational projects'

CASD (competitive advantage through strategic design)

Using the strategic role of design to strengthen the competitive position of Product Service Systems and industrial design providers

G-Motiv

Designing motivation. Changing human behaviour using game-elements. Achieving lasting change is difficult; people are often poorly motivated to change their behaviour.

PSS101

This project is developing a framework of tools, techniques and methods that improves conceptualization and communication between all those involved in designing PSS, across industries.

GRIP

When designing a PSS, designers try to find a balance between flexibility and control to create effective and socially responsible value for users and other stakeholders.

CIRCO

CREATING BUSINESS THROUGH
CIRCULAR DESIGN

CIRCO IS ONDERDEEL VAN CIRCULAIRONDERNEMEN.NL

NUOVALENTE

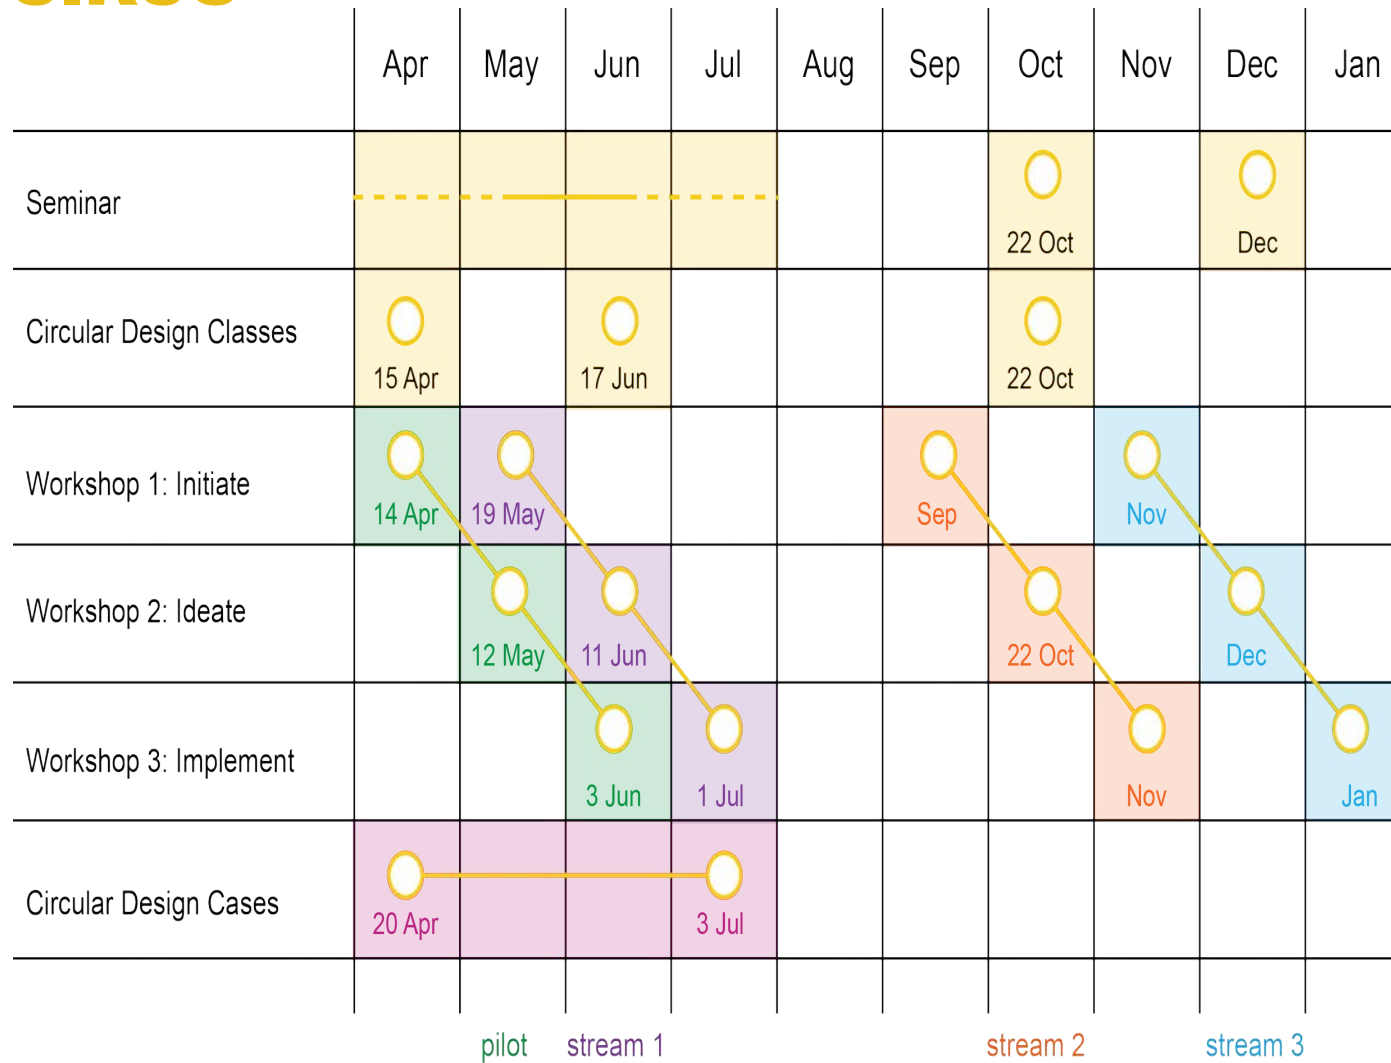

CIRCO 2015

- **Circular Design Classes** - for designers that last: one day training about circular design for professional designers
- **Circular Business Design Tracks:** in series of workshops, companies and designers jointly create new circular products, services and business models.
- **Circular Design Cases:** project in which students and designers work together to (re)create circular iconic products.
- **Seminar** during the Dutch Design Week, part of the DRIVE festival of CLICK NL
- Inspirational **talks** throughout the country
- Online publications of **Best Practices**, tools, articles and interviews

CIRCO

RACE

Realising Acceleration towards a Circular Economy

The RACE Coalition, consisting of the societal organisations, is working on 7 themes to accelerate circular business in the Netherlands. Each theme has a primary leader who works with partners such as TNO, IMSA and Acceleratio. The Ministry of Infrastructure and the Environment supports the RACE Coalition.
