

EU energie- en klimaatdoelstellingen: op weg naar 2050

**EU-2050 Power Lab
KIVI NIRIA en USI**

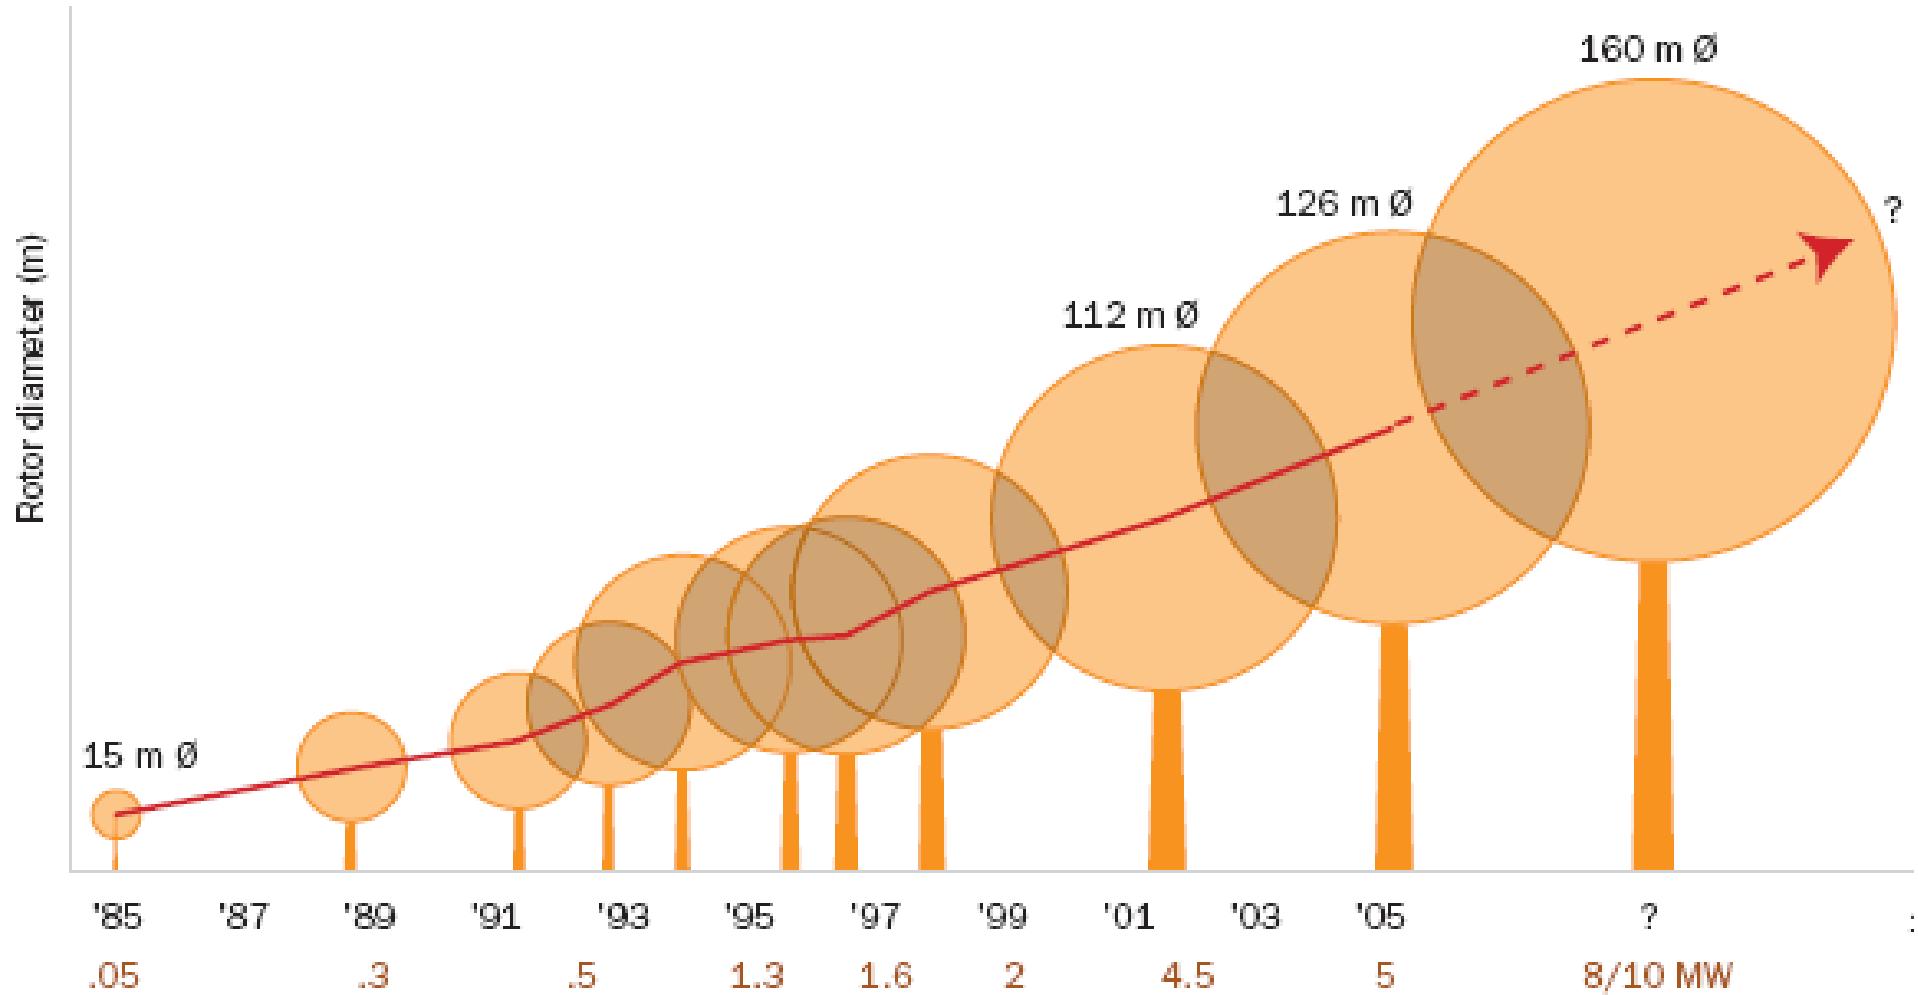

23/04/2013
Kornelis Blok

Doelstellingen Europese Unie 2020

- > 20% reductie van broeikasgasemissies
 - Ten opzichte van 1990
- > 20% bijdrage van duurzame energie
 - In finaal energiegebruik
 - Transportbrandstoffen minimaal 10%
- > 20% extra energiebesparing
 - Ten opzichte van een BaU referentie

Vastgelegd in Energie- en Klimaatpakket 2007/2008

From early R&D to a large-scale market

Duurzame energiedoelstellingen voor 2010

- > Elektriciteit: 22% in 2010
 - richtlijn van 1997
 - gedifferentieerd per lidstaat, non-binding
 - 21% inclusief nieuwe lidstaten
- > Transportbrandstoffen: 5,75% in 2010
 - richtlijn van 2003
 - geen differentiatie
- > Warmte: geen doelstelling

Still diversity of support schemes in Europe but with some converging trends

Quota obligation

Feed-in tariff

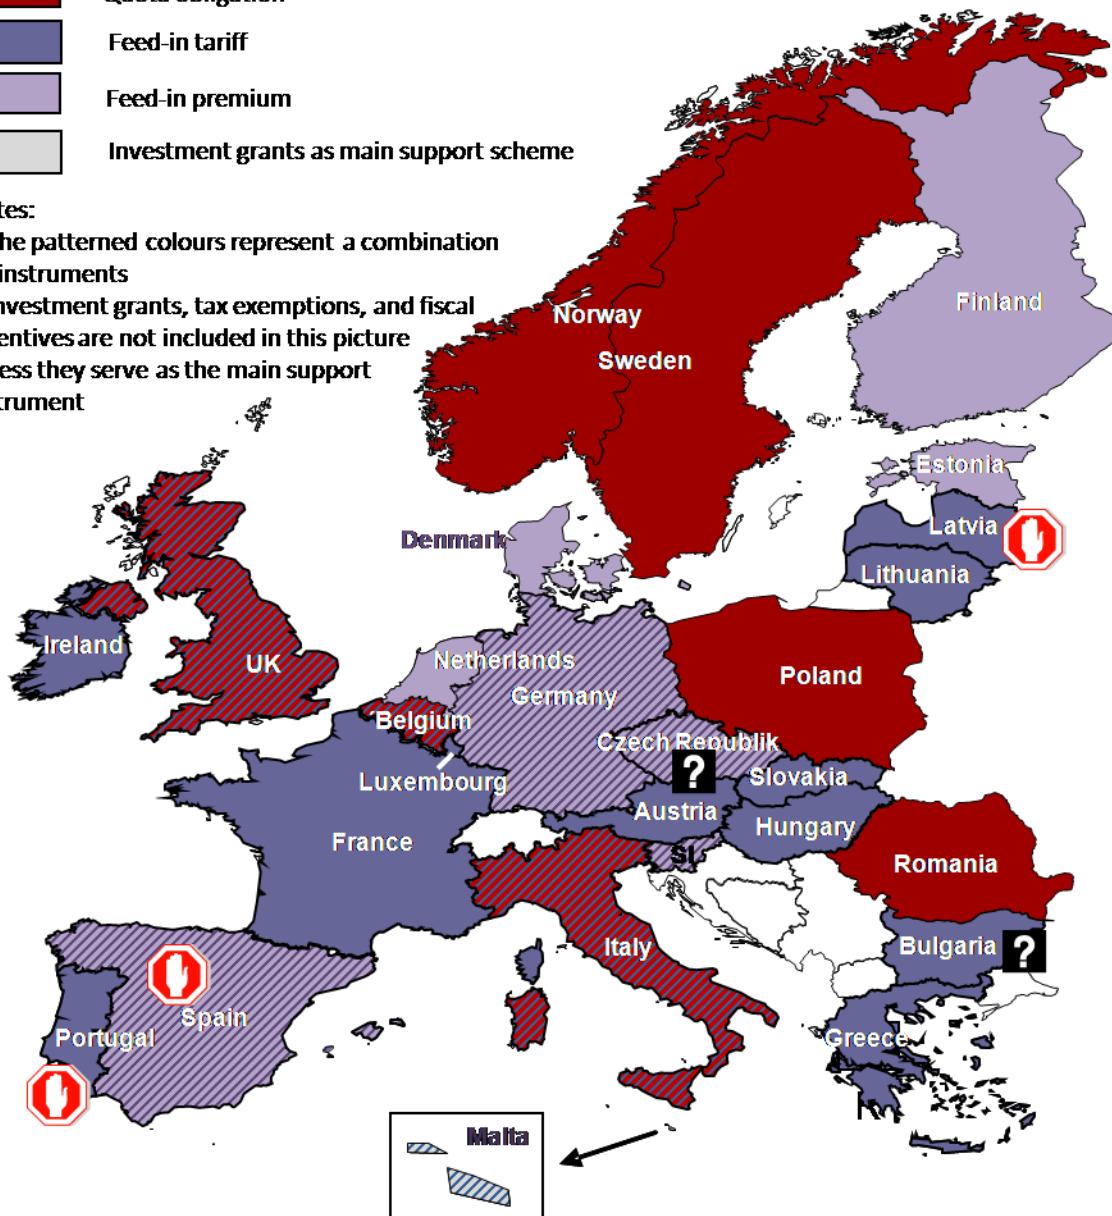

Feed-in premium

Investment grants as main support scheme

Notes:

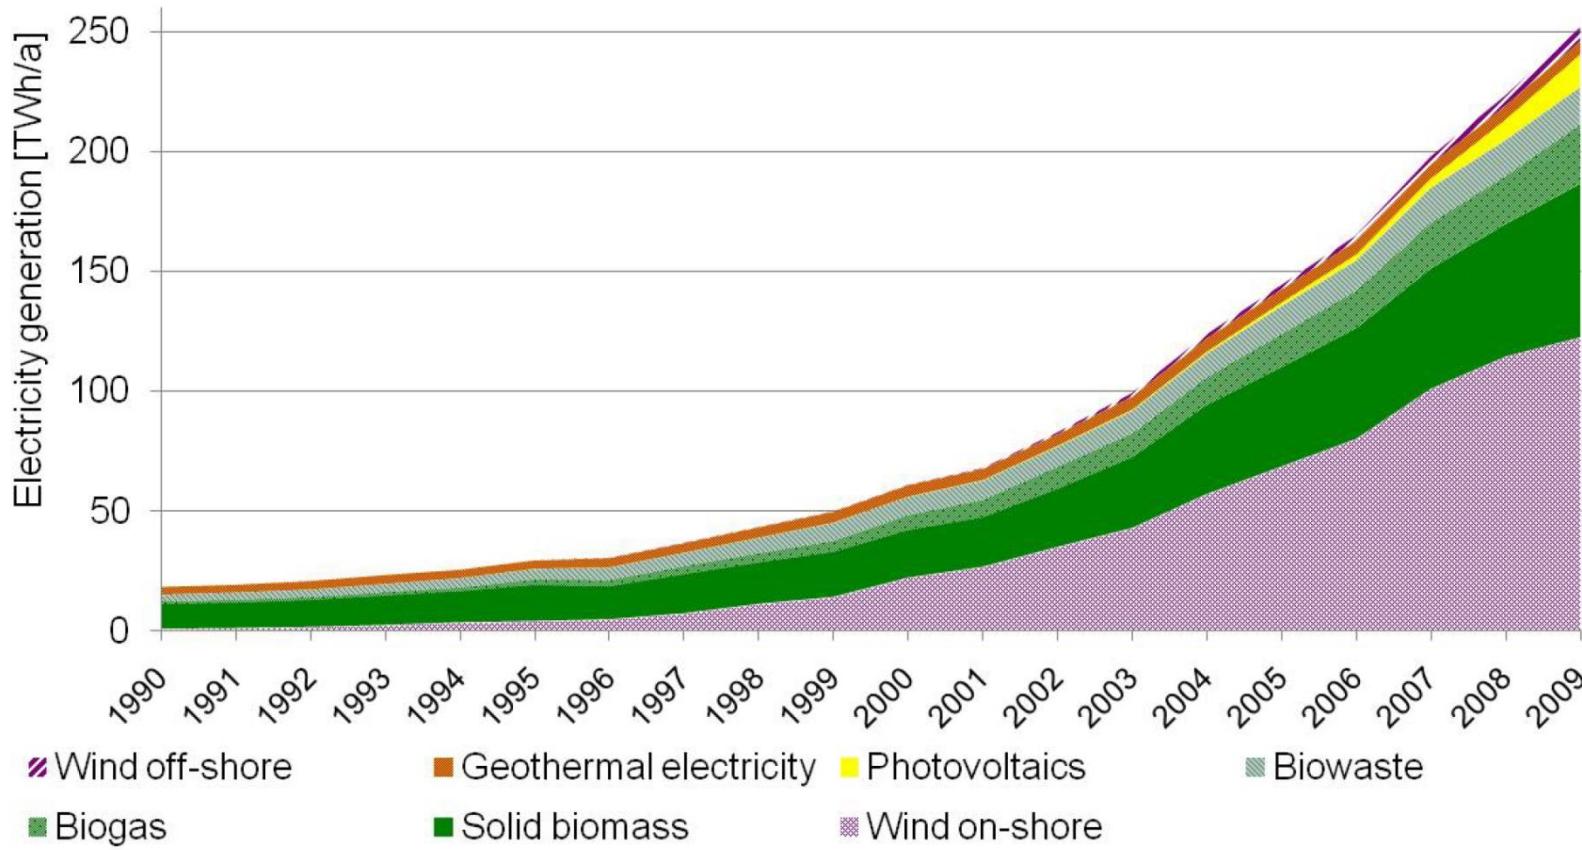

1)The patterned colours represent a combination of instruments

2)Investment grants, tax exemptions, and fiscal incentives are not included in this picture unless they serve as the main support instrument

Scenario voor 2050 (Climate Roadmap)

Source: A Roadmap for moving to a competitive low carbon economy in 2050, European Commission, 2011

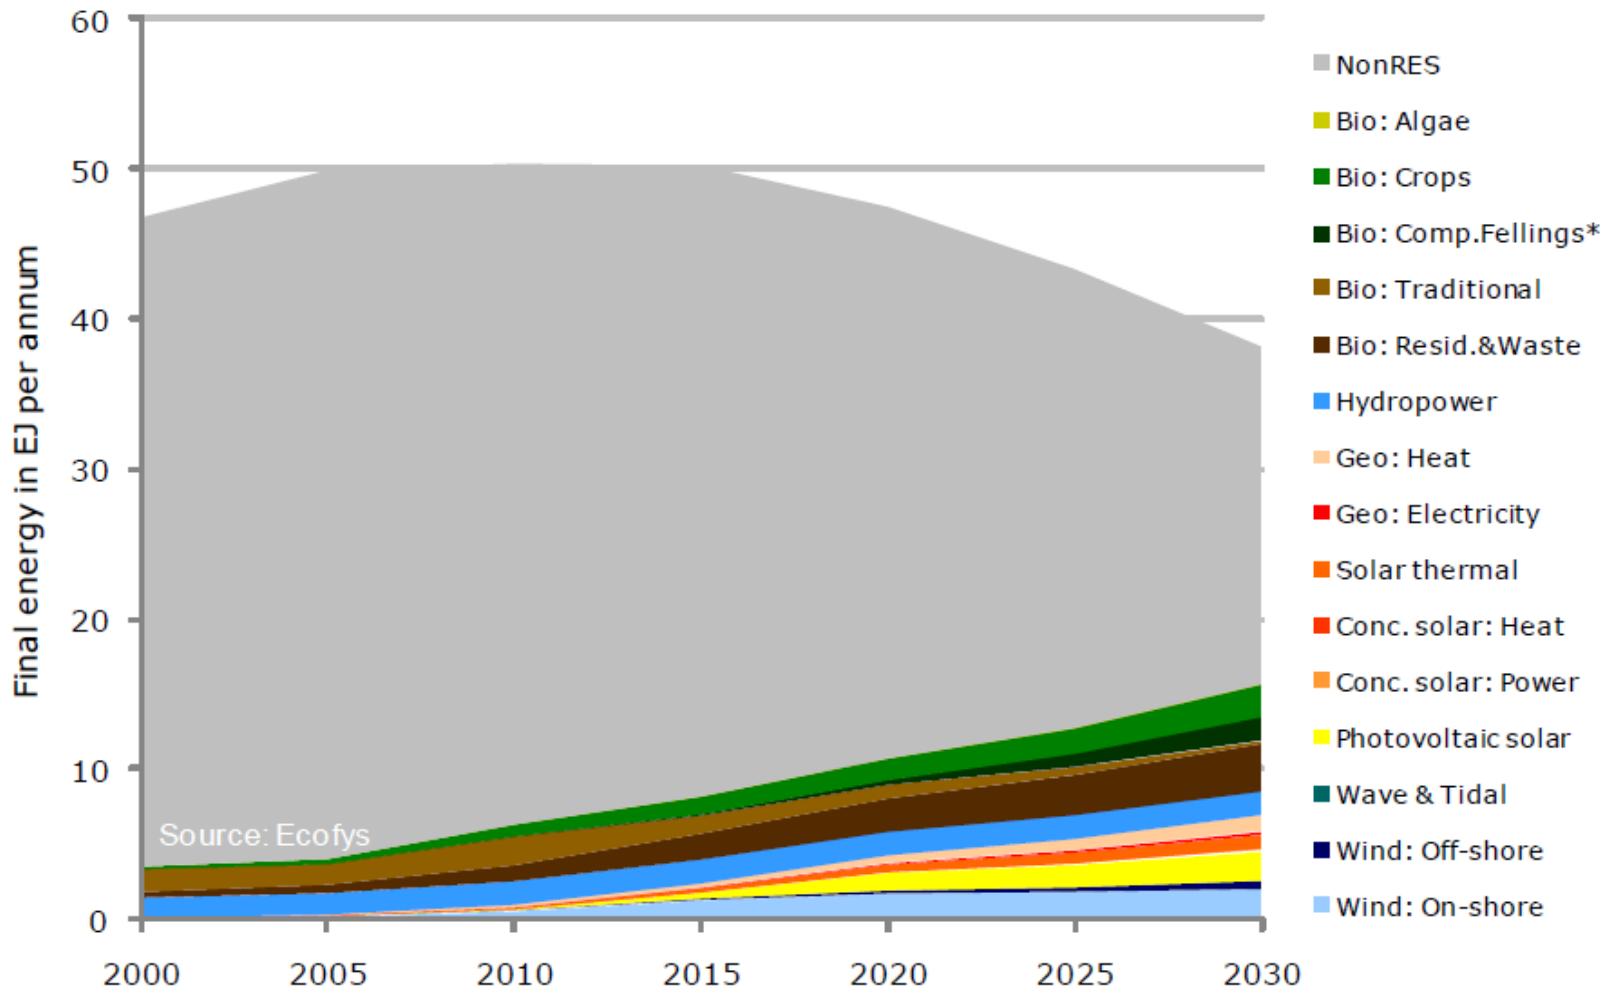

> 80-95% emissiereductie van
broeikasgassen t.o.v. 1990

De discussie voor 2030

- > Doel voor broeikasgasemissies: -40% (?) t.o.v. 1990
- > Aparte doelen voor duurzame energie en energiebesparing?
- > Welke mate van Europees beleid?
- > Convergentie en harmonisatie?
- > Reparatie van EU ETS

Naar 100% duurzaam in 2050?
